

# encrypt

## Privacy-Supporting Technologies

### Pre-processing Tool

Prepares data for processing

### Knowledge Graphs

Enhances data interoperability

### Risk Assessment Tool

Evaluates privacy and security

### AI Recommendation Engine

Suggests optimal PPTs

### User-Centric Design

Ease of technology use

## Privacy-Preserving Technologies

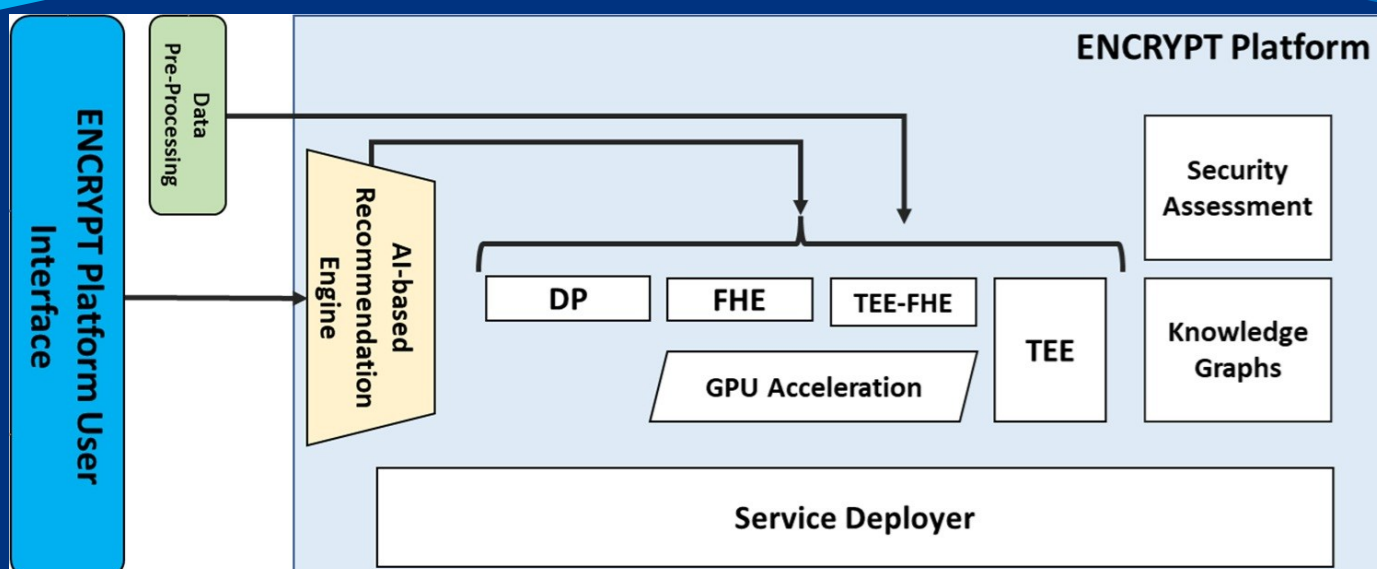

Fully Homomorphic Encryption  
Data Analysis on Encrypted Data

Trusted Execution Environments  
Ensuring Secure Data Processing

Differential Privacy (DP)  
Share Data, Keep Secrets Safe

Hybrid Protection Services  
Bringing together TEE and FHE

Hardware Acceleration  
Boosting Performance

Funded by  
the European Union
